Susan M. White
Mine Program Coordinator
Mineral Regulatory Program
State of Utah
Department of Natural Resources
Division of Oil Gas and Mining

Dear Ms. White:

Please find attached three maps that are the response to two letters from DOGM dated Oct. 26 concerning the five-year review of Reclamation Surety estimates at M/049/002 (Smokey Joe Mine) and M/049/030 (Snow White Mine).

A copy each of the Reclamation Treatments map and Surface Facilities map that were recently submitted as part of a Large Mine Plan are included for M/049/030. No activity has taken place since these maps were made. Hopefully these will be sufficient for this request.

Although there was seeding that took place at the Snow White mine in the fall of 2005, at this time a form MR-Bond-Release is not being submitted, but it is our intention to submit one for this work.

Sincerely,

John Hewitt
Assistant Plant Manager
